Accessorize
to Organize

Shelving for Life®

The True Cost of Ownership: Camshelving® will never rust or corrode. It has built in modular flexibility. Add, remove, and accessorize as much or as little throughout the years as needed. You'll buy it once and use it forever. That's one less thing for you to worry about.

Measurable Results from Day One: With Camshelving, you'll immediately see storage in a different way. You'll increase fully accessible storage space, in the same space. It's ridiculously easy to keep clean. And you can add or move shelves whenever and wherever needed.

Install Anywhere: Camshelving can handle a lifetime of cold, moisture, acidic ingredients, humidity, and constant cleaning. It's completely at home in walk-in coolers, freezers, dry storage areas, kitchens, and wet dish rooms.

Short Term Shelving

Wire shelving, coated or uncoated, has a limited lifespan. Exposure to moisture, acidic foods, cleaning chemicals, and harsh environments eventually lead to rust, making it difficult to clean and adjust shelves. Shelves also can shift unevenly off brackets or even bend. Inevitably, old shelving is thrown out into landfills and new wire shelving is installed. And the clock to replacing the shelving starts ticking once again.

Cleaning Made Sim

ple

DIFFICULTY

EASY

NORMAL

IMPOSSIBLE

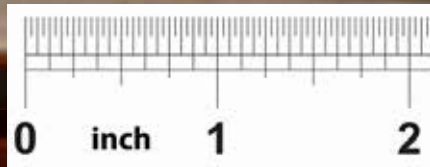

Cleaning shelving shouldn't disrupt your business. Camshelving® is so easy to clean.

See a spill or a splash? Remove a single shelf plate and quickly run it through the dishwasher. Wipe down a post or traverse. Or easily remove one shelf at a time for deep cleaning.

Shelf plates offer extra insurance with molded in antimicrobial Camguard®, helping inhibit the daily growth of harmful bacteria and microbes.

More Storage in the

Unlock up to 2" of additional usable storage space with every shared unit in a continuous storage line, all without compromising weight bearing capacity. Fewer posts not only maximize space but are also budget-friendly, embodying a smart, economical choice.

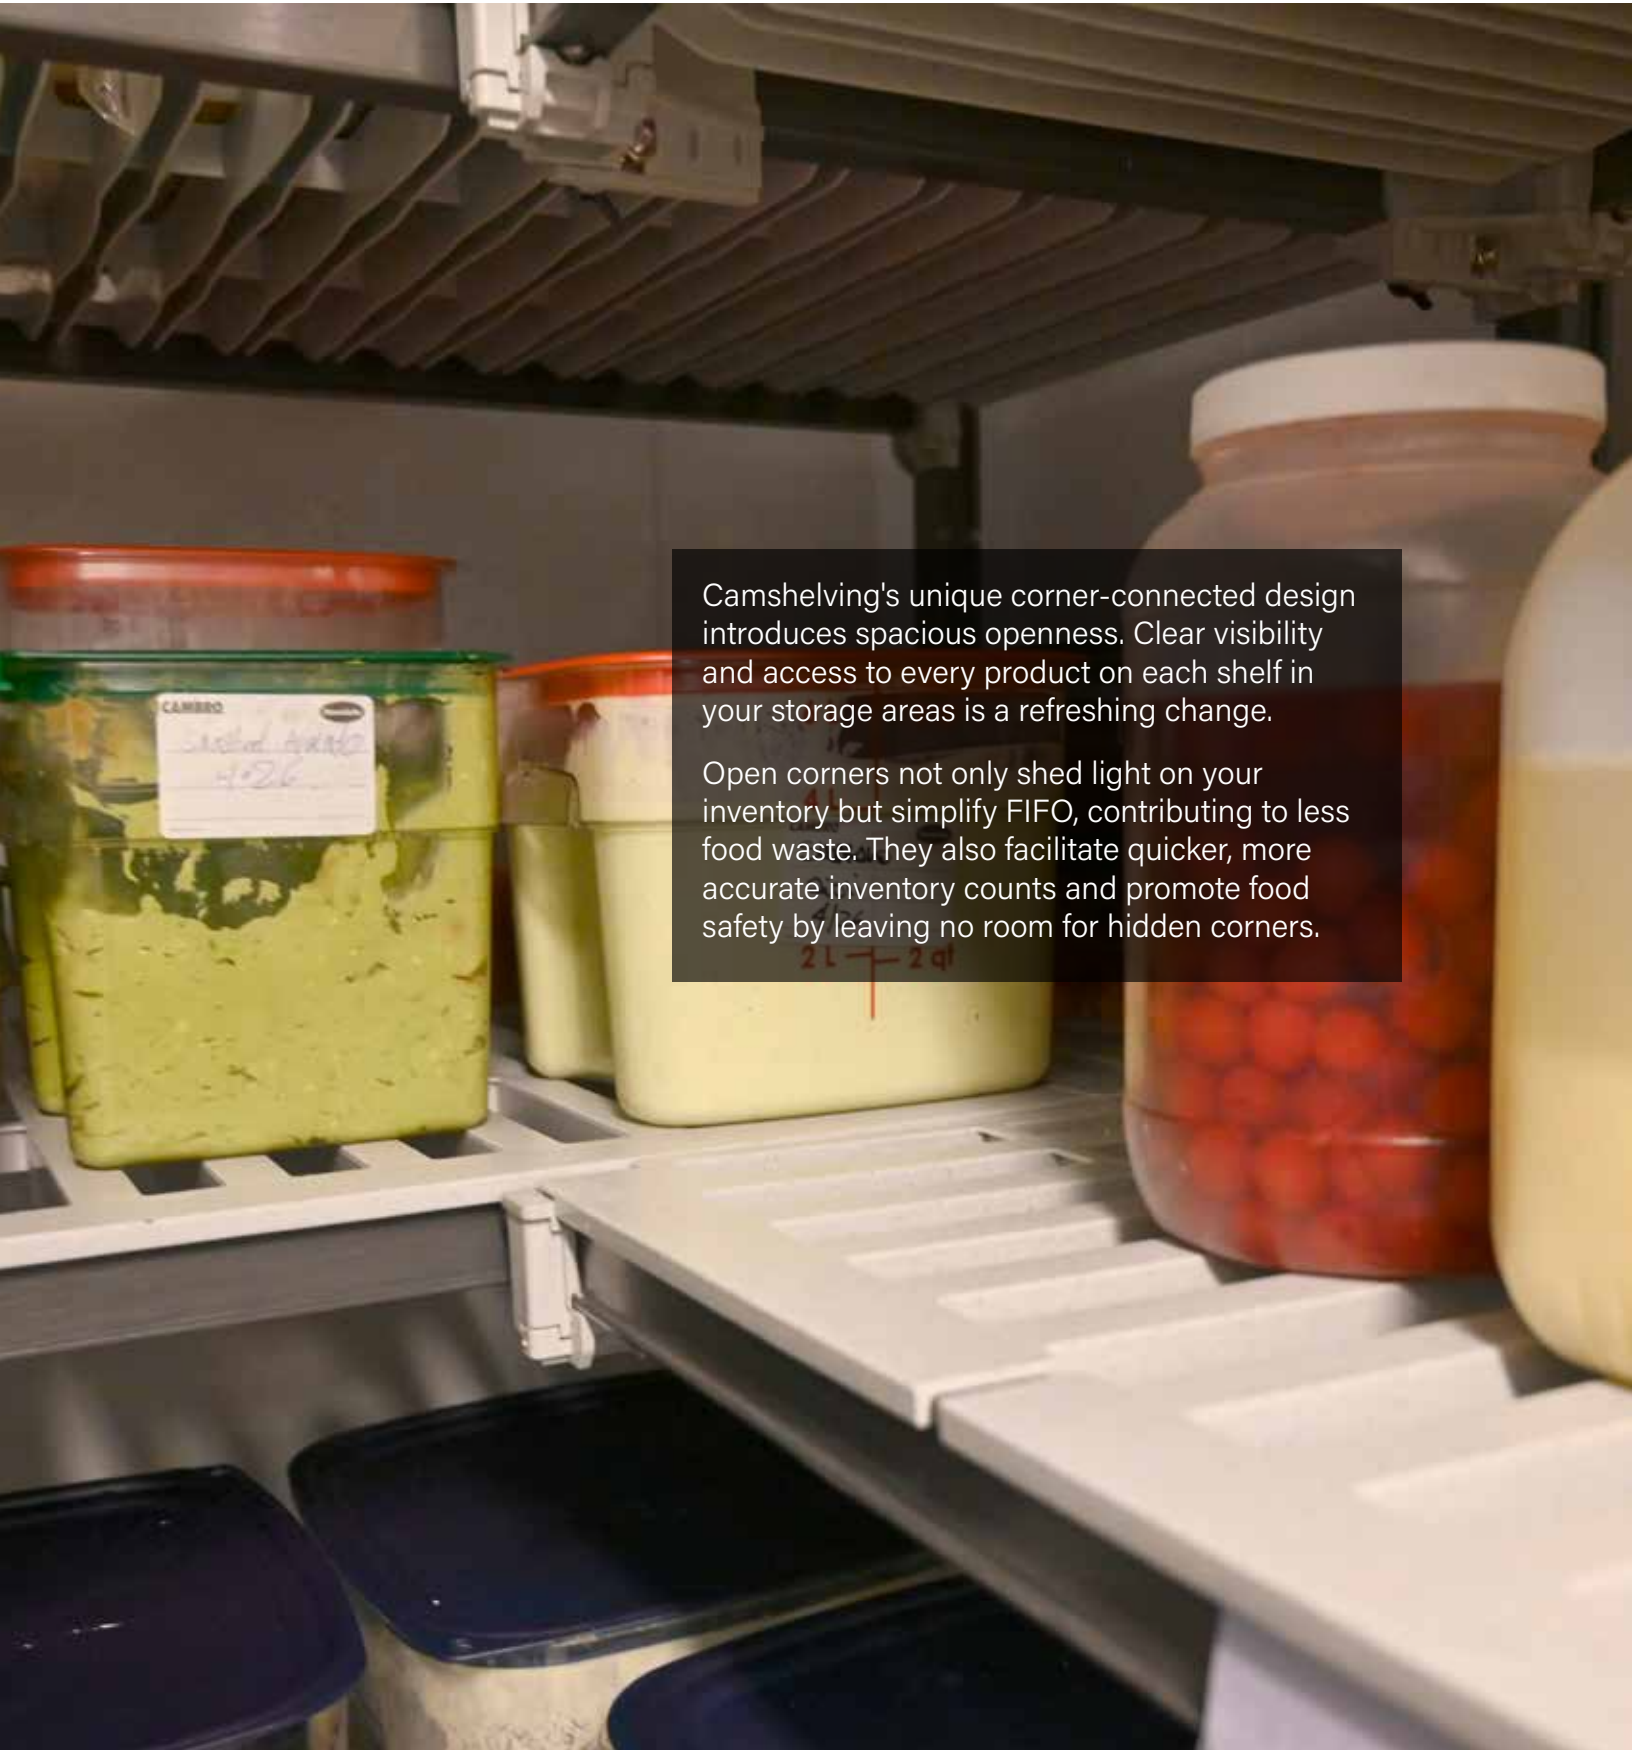

Shared posts usher in a high level of flexibility. Shelves can be individually set at varying levels to accommodate different product sizes and heights. Designed for growth, extra shelves can be added anytime as needed, ensuring your storage setup evolves seamlessly with your demands.

Same Space

Nothing in Your Way

Camshelving's unique corner-connected design introduces spacious openness. Clear visibility and access to every product on each shelf in your storage areas is a refreshing change.

Open corners not only shed light on your inventory but simplify FIFO, contributing to less food waste. They also facilitate quicker, more accurate inventory counts and promote food safety by leaving no room for hidden corners.

Premium® Series

STATIONARY • MOBILE • HIGH DENSITY TRACK SYSTEM

Since 1999, the original Camshelving® has delivered unmatched product excellence and performance in kitchens around the world. With steel core posts and shelf traverses, it's solidly stable in any environment. And with sleek, plastic molded-in components, it's still the fastest and easiest shelving to assemble and adjust, even by one person.

Composite material with a molded-in steel core

Elements® XTRA Se

STATIONARY • MOBILE • HIGH DENSITY TRACK SYSTEM • UNDERCOUNTER

The Camshelving® Elements XTRA Series steps forward, succeeding the established Elements Series launched in 2010. Though priced below the Premium Series, it mirrors its high-performance functionality and delivers more. The new snap-on, single piece shelf dovetail is a notable refinement, simplifying assembly remarkably. The weight bearing capacity has been amped up by 20%, remaining consistent even in the corners. With universal posts and shelves, transitioning units from stationary to mobile is now a breeze. This series encapsulates a thoughtful evolution, enhancing practicality while maintaining trusted performance.

Basics® Plus Series

STATIONARY

Since 2013, the Basics Plus Series has emerged as a value-driven choice within the Camshelving® line, presenting a hygienic alternative to wire shelving. Performance-wise, it holds its own, suitable for installation in a variety of settings without compromising on budget. While the product selection is streamlined, it aptly caters to most basic shelving needs.

We Have a One Track Mind

Elements®
XTRA Series
High Density
Track System

Premium® Series
High Density Track System

The High Density Track System offers an excellent alternative to traditional shelving placed against the wall or placed back to back. It's designed to create more storage space in tight or limited storage areas and can add significantly more "high density" storage in larger spaces. Simple to install anywhere - even in coolers and freezers. A unique raised track is secured on each end with a stationary shelving unit and requires no drilling or floor bolts. Mobile units with grooved casters roll smoothly and securely on the track.

Increase storage capacity up to **50%**

Camshelving® vs Wire

Yes	Lifetime Warranty	No

Re-Defining

Storage Beyond Shelving

Keep It Moving

Rust-free mobile solutions from back to front of the house.

Flex Stations

Versatile, modular serving solutions that adapt to any space, optimizing foodservice efficiency and convenience.

Ultimate Sheet Pan Racks

Unparalleled durability and capacity, designed for seamless transportation and storage of sheet pans.

**Quiet Glide
Casters**

Food Pan Trolleys

Compact, easy access, vertical storage for organizing and moving food pans in kitchens, coolers, or freezers.

Drying and Storage Rack Units and Single Cradles
Smart solutions for efficient drying plus organized storage of various prep, meal delivery or storage items, further enhancing safety and workflow in any foodservice operation.

Accessorize to Organize

Single Shelf Sheet Pan Rack

A budget friendly tray storage solution that installs on shelves, freeing up mobile speed racks.

Straight or Angled Divider Bars

Create prep or service stations for food pans or food boxes.

ID Tags

Clips easily onto traverses, ensures everything is in its place.

Pegboard Storage System

Eliminate unsanitary storage and free up valuable shelf space with a one-stop solution.

Single Shelf Security Cage

Create instant secure storage, shelf by shelf, wherever needed.

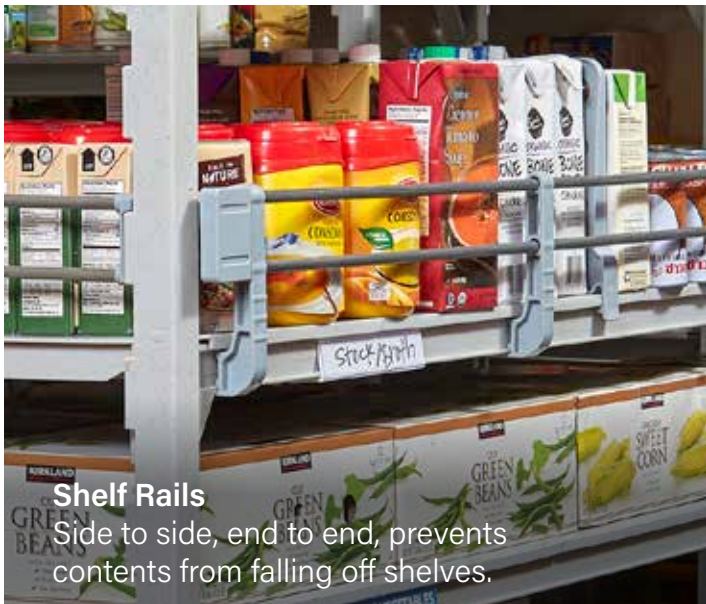

Dunnage Racks

Heavy-duty and highly durable, ideal for storing frozen, fresh, or non-perishable products safely off the floor.

Divider Panels

Use to separate and organize small items on shelves.

Shelf Rails

Side to side, end to end, prevents contents from falling off shelves.

Full Security Cage or Full Unit

When securing contents is required all the way around.

Wall Fastener

Secure stationary units to the wall for added safety and stability.

Floor Fastener

Secure standard or High Density stationary units directly to the floor.
